

Freund to display slaughtering & meat cutting technology

Freund Maschinenfabrik of Germany will showcase its state-of-the-art slaughtering and meat cutting technology at the International FoodTec India 2006 exhibition in Mumbai from November 23-25.

Taking centre stage at the show are technology and equipment on stunning, stimulation, cutters for legs, horns and heads, rectum cutting, debiding, breastbone and splitting carcasses, primal-breaking, meat & bone cutting saws and shears as well as corresponding accessories will be displayed.

Its applications can be used at slaughtering and cutting plants of cattle, pig, poultry, sheep, horses, buffalo and camel.

With more than 75 years of experience, Freund is now among the world's three largest manufacturers of slaughtering and cutting technology. Its has over 75 distributors worldwide.

About 83% of Freund's production is exported and machines are operated in more than 80 different countries worldwide.

Circular Cutting Knife – ZKM Table version will be displayed at the International FoodTec India. It is fixed to a table, with integrated rollers-compact unit to be installed in front of a cutting line-for a one-man operation.
