Endeavour

by freund-germany.com

The new Endeavour range of trimming machines

Precision engineered and manufactured to the highest standard - now in Germany. The Endeavour Program has ring blades for all applications, with ca. 20 different styles and blade sizes from diameter 16 to 128 mm.

The new Series 2 handpieces with quick blade change system need no tools for quickest blade replacement.

Whatever your requirement, finishing meat-cuts, slicing salmon, or the simple removal of excess fat from beef or pork, Endeavour is the precision trimmer for every operation.

Adaptive

The Adaptive System can be used on any trimmer motor unit. The modular System fits to other motor drives offering a low cost trimming alternative with reduced investment. It fits to all Bettcher®-Whizard®-Motors and any standard size hand-piece can be supplied.

MiniCut

- Excellent for Kebab and Smoked Salmon slicing
- Easy to install, operate and maintain
- Fine depth adjustment for exact thickness required
- Easy to remove motor unit when cleaning
- Will accept all sizes of handpiece (35-128)
- Low-cost motor-units (2900 pm) for smaller budgets
